EXPERIENCE

Lighting, Compositing Artist, TD | Sandwich Kwon Do (Student Short) Jan 2026 - Present

- Presents lighting passes in dailies to meet art direction across seven sequences.
- Leads a team of four lighters to meet production goals for test shots and film sequences.
- Develops lighting and compositing tools in Houdini and Nuke to aid production, including painterly crepuscular rays and pre-built render presets.

Lighting, Compositing & Render Artist | Honey Business (Student Short) Jan 2026 - Apr 2026

- Optimized RenderMan Path Tracer settings to decrease render time for dailies by 6-10x.
- Lit and composited character shots in Houdini and Nuke across four sequences.
- Configured render layers and LPEs for compositing artists to allow greater flexibility.
- Managed the production-wide render farm to ensure steady shot output across seven sequences and over 120 shots.

Lighting Artist | Scuttle (Student Short) Apr - Aug 2025

- Assembled the lighting master rig in Unreal Engine 5's Path Tracing mode to be used across the film.
- Did individual shot work along with approving shots from the other three lighters.
- Managed a team of three lighters to maintain cinematic quality and visual consistency under tight production deadlines.

3D Animator | BYU Athletics Aug/2025 - Jan 2026

- Designed and carried out the implementation of graphics and animations in Cinema 4D to be used in stadiums for BYU's football and basketball teams by 60,000+ fans.

EDUCATION

Brigham Young University Jan 2024 - Present
Computer Science: Animation & Games Emphasis, BS Expected Graduation: Jun 2027

- Developed a ray tracer from scratch in Rust with Phong and Whitted-style Materials, reflections, and dielectrics.
- Created a tool to allow artists to easily configure LPEs for lights and quickly apply comp grades in Houdini to be re-rendered.

TECHNICAL SKILLS

- **3D & VFX Software:** Maya, Houdini/Solaris, Unreal Engine, Cinema 4D, Substance Painter
- **Compositing & Rendering**: RenderMan, Nuke, Arnold, Redshift, After Effects
- **Programming & Pipeline:** Python, Java, C++, Rust, Linux, USD, Git, ACES, OCIO
