EXPERIENCE

Lighting Artist & TD | Sandwich Kwon Do

Feb/2026 - Present

- Led a team of lighters to meet production goals for lighting test shots and film sequences.
- Developed stylized lighting tools such as painterly volumetrics, depth of field, and shadows.
- Optimized rendering tools for easier artist use and quicker iterations.

Lighting & Render Artist | Honey Business

Jan/2026 - Present

- Optimized Renderman Path Tracer settings to decrease render time for dailies by 6-10x.
- Configured render layers and LPEs for compositing artists to allow greater control over lights, objects, and types of scattering.
- Managed the production-wide render farm to ensure steady shot output.

Lighting Artist | Scuttle Student

Apr - Aug/2025

- Led lighting for the student film *Scuttle* in Unreal Engine 5, translating 2D concepts into 3D environments.
- Managed a team of lighters to maintain cinematic quality and visual consistency under tight production deadlines.

3D Animator | BYU Athletics

Aug/2025 - Jan/2026

- Designed and carried out the implementation of graphics and animations in Cinema 4D to be used in stadiums for BYU's football and basketball teams by 60,000+ fans
- Assisted in editing and compositing projects in Photoshop and After Effects.
- Worked with other team members on projects and in-stadium mobile games to improve fan experience.

EDUCATION

Brigham Young University

Jan/2024 - Present

Major: Computer Science: Animation Emphasis

Expected Graduation: Jun 2027

- Developed a ray tracer from scratch in Rust with Phong and Witted-Style Materials, shadows, and reflections.
- Implemented a chess server from scratch using HTTP and WebSockets that handles multiple users and games simultaneously.

TECHNICAL SKILLS

- **Compositing & Rendering:** Renderman, Nuke, Arnold, Redshift, After Effects
- **3D & VFX Software:** Maya, Houdini, Unreal Engine, Cinema 4D, Substance Painter
- **Programming:** Python, Java, C++, Rust, Linux
